Production Overview

- 2 factories with total annual capacity of 200,000 tons.

SVCP Product

- Vitrified Clay Pipes from DN 100 - 1200.
- V.C Perforated pipes from DN 100 - 1000.
- V.C Fittings & Accessories from DN 100-1200.
- V.C. Jacking Pipes for micro tunneling from DN 150 - 1000.

Mission and Vision

Mission and Vision

- Providing vitrified clay pipe products of outstanding quality consistent with customer requirements, applicable codes and standards.
- Maintaining a leading position in the Middle East for the manufacture and supply of clay products.
- Working towards the continuous improvement of the use of clay pipes in sewer networks and ensuring/maintaining superiority of vitrified clay pipes over other types of pipe materials.
- Ensuring stable and continuous supply of all project requirements in Saudi Arabia and GCC.
- Achieve & secure an international market leader position.

Strategy

- Guaranteeing and ensuring delivery of high quality products through the supply of a comprehensive range of products as well as offering after sales service to customers.
- Maintaining production growth in order to meet future demands.
- Developing and maintaining long term business relationships with suppliers in order to guarantee and maintain SVCP's superior leading position in the domestic and regional markets.
- Creating strong business relationships with key international manufacturers which will add value to SVCP's business.
- Maintaining technical and knowhow agreements with international companies.

Marketing & Sales Strategy

- Providing a comprehensive range of products including related accessories for projects at competitive price.
- Providing technical support during the design phase and on-site implementation phase to ensure proper implementation and application of V.C materials.
- Providing a full range of brochures and catalogues for all technical and practical needs.
- Guaranteeing recycling of scrap materials.
- Guaranteeing timely and efficient execution of projects.
- Guaranteeing fixed prices through the life of the project.

Investment Strategy

- Continuously investing to improve, renew and replace necessary equipment's and tools to enhance and maintain quality products.
- Maintaining necessary inventory of spare parts to minimize production downtime and ensuring optimal utilization & efficiency of production facilities.
- Diversification of investments in the field of pipe industry for continuous growth & development to ensure best service to the society for generations to come.

Why Use Vitrified Clay Pipes

Advantages

- VC Pipes are made of pure clay. No chemicals added
 - Clay, grog (chamotte), water, loam glaze
- Exploitation of clay does not have any environmental hazards.
- Preparation of raw materials and pipe production is less energy consuming in comparison to other pipe types.
- Raw materials are available locally.
- The only unlimited long life pipes that can stay in service for hundred of years
- **Application:**
 - Gravity sewer networks
 - Industrial sewage
 - Storm water disposal
- Thermal and mechanical stable pipe
- PH resistance from 0 - 14

+ 1400 Years Old VC Pipe

Quality Policy

- Provide Vitrified Clay Pipe products of outstanding quality, consistent with customer requirements and applicable codes/standards - GSO EN 295-1:2008.
- Implement and maintain the quality management system requirements of ISO 9001 (2008) standard.
- Work towards continual improvement in every functional area by taking into consideration the customer feedback.
- Maintain a leading position in the Middle East area for manufacturing and supplying of Vitrified Clay pipe products for drainage and sewerage.

Quality Assurance

- SVCP is an ISO 9001 certified Co.
- Certified to EN 295 by MPA NRW- Germany
- SASO quality Mark certified products.
- Environment Certificate
